

Ethan Rohman

Full Stack Software Developer

ethan@ethanrohmandev.com · github.com/EthanRohman93 · ethanrohmandev.com

Summary

Full stack software developer focused on building long lasting APIs, clean front ends, and infrastructure that survives production. Comfortable across the whole stack, from Terraform and AWS networking down to SQL migrations, with a love for low level languages and tools that stay usable on a bare server.

Skills

- **APIs:** Spring Boot, Node.js, FastAPI, Django
- **Front End:** React, Next.js, TypeScript, JavaScript, CSS, SASS, Tailwind, HTML
- **Database:** MongoDB, PostgreSQL, AWS Aurora PostgreSQL, Flyway
- **CI/CD:** GitHub Actions, Bash automation
- **Infrastructure:** Terraform, AWS (IAM, EC2/ECS, networking), Docker, AWS CLI scripting
- **Testing:** Playwright E2E and integration, Pytest, JUnit, Vite, Zig test

Personal Interests

Networking and HTTP/API design, low level languages (Zig, C, Rust), Vim/Tmux and replicating a productive editor everywhere, web development, basketball, lifting weights, cooking, and video games.
